00:00-00:04	Welcome to Secure the Vote!	A logo is shown with the words Secure the Vote and the date March 24, 2020.
00:05-00:19	Let's begin the new voting procedure which is simple and secure. When you enter your designated precinct, you will be greeted by a poll worker. You will hand your government issued photo ID to the poll worker who will scan it into the poll pad.	In a voter precinct, a woman voter walks toward a woman poll worker sitting down at a table. The voter hands her identification to the poll worker who checks her ID and scans it into the poll pad.
00:23-00:30	You will review your information on the poll pad and sign your name with a stylus pen approving your information.	The voter signs the poll pad with a stylus pen.
00:37-00:40	The poll worker will return your ID.	The poll worker hands back the ID to the voter.
00:44-00:51	After the poll worker confirms your information, you will receive a voter card. Now you are ready to vote!	The poll worker hands the voter a voter card.
00:54-01:18	A poll worker will then direct you to a touch screen and printer in your private voting station. To begin voting, you will insert your voting card arrow side up into the bottom area of the touch screen. The touch screen will prompt you in the lower right through the ballot. Use your finger to make your selections. At the end of your ballot, review your selections. Press print on the touch screen and your ballot will print within your voter station.	A voter station is shown with a large touchscreen and printer located on the right of the touchscreen. A large cardboard screen surrounds the voter station and provides privacy. The voter inserts a voter card into the bottom of the touchscreen. A ballot is shown on the touchscreen. The voter uses her index finger to make her selections on the screen. After she has completed her ballot, she reviews her choices and selects the print button on the screen.
01:21-01:29	Take time to review the printed ballot. Remove your voting card, and walk to the polling place scanner.	The ballot prints on the printer. The voter takes the printed ballot off of the printer and reviews it. The voter takes her voter card from the touchscreen and walks to the scanner.
01:30-01:53	A poll worker official will be standing near the sealed scanner to assist if needed. A screen on the scanner will show you how to insert your ballot. You have cast your ballot! Turn in your voter card and receive your voter sticker. You can proudly wear that sticker knowing that your vote was cast, securely. If you need assistance with any steps, poll workers will gladly guide you through the voting process.	A side view of a large standalone scanner is shown. A close up of the top of the scanner is shown. A small screen on the top right of the scanner indicates that the "system is ready" and graphically shows directional arrows for inserting the paper ballot. A voter inserts their ballot into the scanner. The screen indicates "Casting Ballot, Please Wait" and "Ballot Successfully Cast." A smiling female voter is shown in a green dress placing a voter sticker on her left side of her chest. The Secretary of State logo is shown.
